

Center for the Promotion of Science, under the auspices of the Ministry of Science, Technological Development and Innovation, announces a Public Call for funding citizen science projects.

Please read the Instructions for the applicants and other complementary information on the [CPN website](#) and prepare project proposal applications accordingly.

The application process consists of filling out this electronic application and attaching mandatory and optional additional documents.

The application consists of specific fields that must be filled in for the application to be complete. All information provided must be in English. Only complete applications submitted before the date 01.11.2023. at 12:00 (noon) will be considered and evaluated. Applications sent later or applications delivered to any other address or in any other way than that specified in the Instructions for the applicants and Rules of the Public Call will not be considered. Upon submitting the proposal, applicants will receive a confirmation of submission. Once a proposal is submitted, applicants can no longer edit it or download uploaded documents for further editing or updating.

All interested applicants can send their questions by e-mail to citizenscience@cpn.rs

Project Idea and Team

Proposal title *

Characters Left: 150

Keywords *

Characters Left: 150

Summary *

Provide a brief overview of your proposed project

Characters Left: 1000

Goals of the project *

Characters Left: 1000

Project description *

Answer the following questions:

How is your project different from others? What new knowledge will it contribute to society? What is the primary methodology approach? Who are the key stakeholders?

Characters Left: 3000

Project team (description) *

Answer the following questions:

Who are the core members of your team? What are their relevant skills and experience? What expertise are you missing? Does the team have experience in research activities, managing communities, citizen science, etc.? Have they identified relevant expertise gaps and ways to fill those gaps? Does the team involve experts from different disciplines? How is or will your project team (including involved citizens) be inclusive and diverse?

Impact and Community

Impact of the project *

Answer the following questions:

What challenges will the citizen science approach allow you to address that you could not otherwise achieve? What will be the primary responsibilities of the involved citizens? Which territories will your project cover? What are the end benefits of your project? What positive changes do you expect for your stakeholders by the end of the project? Please mention specific stakeholder groups (researchers, citizens, decision-makers, etc.).

—

Characters Left: 2000

Which SDG will your project contribute to?

- No poverty
- Zero hunger
- Good Health
- Quality education
- Gender equality
- Clean water
- Clean energy
- Decent work
- Industry, innovation, infrastructure
- Reduced inequalities
- Sustainable cities
- Responsible consumption
- Climate action
- Life below water
- Life on land
- Peace and justice
- Partnerships for the goals

Benefit for the community *

Answer the following questions:

Which activities in your proposed project will involve citizens and/or the public? Are the planned activities achievable and accessible to citizens? Do they have sufficient capacity to conduct an engagement at the proposed scale? Is there an effective strategy to engage existing or new citizens in the project activities? How do you intend to attract and maintain citizen and stakeholder engagement? Why will people want to contribute? Will there be an opportunity for involved actors and the public to learn something from the project outcomes or activities?

—

Characters Left: 2000

Alignment with SDGs *

Answer the following questions:

Is your project in line with the SDGs? If yes, in what way? If not, what crucial societal challenge will your project address?

Implementation and Budget

Implementation *

Answer the following questions:

Can the project goals be achieved on the scale proposed, with the resources and team proposed? Are the requested resources relevant and suitable for the proposal? Are any critical activities or requirements (such as dissemination) not accounted for within the budget?

-

Characters Left: 2000

Budget

Open science approach *

Answer the following questions:

Does the project follow open science principles? Which data or other outputs do you intend to gather or produce? Will project data and outputs be openly available? Do the approach account for data protection and any personal or sensitive data? What (if any) other ethical challenges does your project pose?
